About Alliance Knowledge Management Limited

Alliance is the pioneer in Asia specialized in supply chain security consultancy. With the implementation of Regulated Agent Regime (RAR) (ICAO Annex 17) since March 2000 in Hong Kong, Alliance has assisted over 900 air freight forwarders to successfully apply for the RA license, implement the RAR program and conduct ongoing risk assessment for security improvement. Other than RAR Program, we also conduct ISO 9001 and ISO 28000, TAPA, AEO, C-TPAT projects for the industry.

How Alliance supported the RACSF roll out?

Since 2016 September, Alliance have been following the directional change closely and collaborated with Supply Chain Security Association in collecting ongoing concerns and suggestions from industry practitioners. Alliance launched the pilot project 'In Town screening for Aviation Security' in December 2016 to assist industry practitioners to fulfill the requirement as an entity which applies sufficient security control to allow carriage. In 2017 September, Alliance also sent member of staff to attend ICAO Global Aviation Security Symposium in seek for the latest update and information with regards to RACSF.
